15. Have you worked on any frame work implimentation ?

16. What is your sprint time period and any lags takes place ? When do you take action on lags

17. What is your role in ajile

18. What is your contribution on ajile ?

Virtusa Polaris:

1.If Id dynamically changing how will u locate the element

2.stale element exception

3. Following siblings

4. Code for scrolldown without using javascript

5.interface

6.inheritance

7.overloading and overriding

8.write code for static Webelement Id=fname and insert some values using xpath

9.what is user acceptance test

10. What are the issue faced in your project .

11.how will u generate report in cucumber

Virtusa polaris

L1:

1.introduce yourself

2.rating in selenium

3.Pom working-briefly

4.why we use POM generally

5.how to identify the broken link

6.How many languages u know like gherkin

7.in Cucumber but is a valid keyword

8. Where u are going to write all your script

9.how can you read the data except xcel

10.what is iterator and where we use

11.diff btn list and set

12.how can you read data from database

13.what is index

14.what are the annotations in Testng

15.data provider

16.your current project

17.recent challenges in your project

18.what are the exceptions u faced

19.method overloading

20.reverse the string-oral

21.spirint duration and inside the working

22.diff btn waterfall and agile

L2:

1.project explanation

2.what r the jars used in current project

3.in drop down how can u choose all the elements

4. selenium current version

5.who give you the url

6.whether developers url and testers url will be different

7.how can you execute your testcase

8.your company follow which methodology

9.within the agile process can you explain your role

10.who will assign your user story

11.id-firstname

Id-#$%gain£×¥@^(suffling I'd is present) this was dynamically changing,how can you automate this

12.testng have annotation flow can you explain

13.how can you read your test data

14.overloading example program

15.regression testing

16.performance testing

17.any defect arises then where you can report.

18.what is following and preceding and write the xpath
